

A six-part series starting

ORIGINS has a unique way of providing evidence for the common ground and conflicts between science and religion—specifically on the subject of Creation vs Evolution. This 6-part presentation will have a live speaker while also presenting video interviews with some of today’s leading experts on Creationism. Uncover scientific evidence that directly points to the authority of the creation narrative (yet is often overlooked) and learn from one of the oldest living texts in our world – the Bible.

It was important to Dr. Hudson to make sure this series provides all the data in an easy-to-follow format. He promises this series will answer many questions about how the world began, introduce God as a loving Creator who made us for a purpose, and point to Him as the Alpha & Omega in the human story.
