Helps

1. Habitat: Distinctive and characteristic surroundings, such as a pond or deciduous woodland. A habitat is determined chiefly by the vegetation. It can be a woodland area, a backyard, fruit orchard, or vacant lot. It can be as small as a tree or a rose bush and it can even be inside your home.
2. This can be done in one outing, but it's more interesting if the habitat is visited more than once and at different times of day or night.
7. Genesis 1:9-13.
8. Isaiah 65:17-25; Revelation 22:1-5.
9. Suggestions for creating a habitat:
 - a. Plant flowers that will attract butterflies.
 - b. Use real or artificial items to create a show box scene of the habitat you studied.
 - c. Have the class create a mural that combines all the habitats studied.
